THE PLEASURE OF KNOWLEDGE

HOW WONDERFUL THE RENAISSANCE GARDEN IS!

It all began in the mists of time... the journey of life, 500 million years ago, with the first plant forms.

Then came the first mammals about 250 million years ago and finally the first humans, between 250 and 500,000 years ago.

Today, plants and vegetables in general account for between 95 and 99% of all biomass on Earth.

The rest are animals and humans.

The study of Nature is a profound and wonderful tale of science and enchantment.

NATURE CONTAINS ALL CARE IN ITSELF

Water and Earth are our life, **Nature** is the source of peace and tells us stories that we must rediscover listening to and making part of our being.

Stories that speak of feelings and soul, of the world, not just botany.

Nature nurtures our serenity, inner peace, emotional stability, health of the body.

“Nature is not a place to visit to rest, it is home.” Gary Snyder

GREEN CHEMISTRY AT THE FOUNDATION OF THE RENAISSANCE PROJECT

It is with this spirit that we have immersed ourselves in Nature, to choose extraordinary minerals, fruits and flowers, focusing on the well-being of the planet and humans:

- reduction of water, air and soil pollutants;
- improvement of the sustainability of our industrial productions, through renewables energy;
- use of natural ingredients with high added value from traditional materials and recycled food waste;
- use of packaging sourced from eco-friendly materials and recyclable resources;
- textures and aromatherapy designed and crafted to stimulate the pleasure of the senses

RENAISSANCE COLORS:

Renaissance's shades tell a story dedicated to Nature:

Green is the most popular color in the world, the color of nature from which its beauty springs

Blue is the color of water, the generating principle of life

Red is the color of sunset, the inspirer of the human narrative of art

“In all things of nature
there is something
of the marvelous.”

Aristotle

Did you know that...

Every day pollution, heavy metals from the air and water, such as sulfur particles, lead, nitric oxide, are deposited and penetrate the skin, scalp and hair, damaging them right down to the hair shaft: an intoxicated hair not only looks dull, asphyxiated, lacking vitality and suffering, it is also difficult to treat being sensitized and fragile; the scalp becomes irritated and the protective hydrolipidic barrier unbalanced. Suffering hair loses strength, elasticity, responds to technical services in unusual ways and remains styled with difficulty.

RENAISSANCE:
IS AN ALCHEMICAL SYSTEM OF NATURAL TREATMENTS
TO REGENERATE SCALP WELL-BEING AND PROMOTE HEALTHY
AND VIGOROUS HAIR GROWTH.

CARE

From the choice of Natural Biodegradable up to 100% (and 100% Vegan) ingredients, to the textures pleasant to the touch, to the aromatic perceptions built with essential oils, so beneficial for energy vigor and serenity: every detail of the formula has been studied by our laboratories and fine-tuned by our specialists to restore well-being to body and mind.

FORMULATIVE CLARITY

Each product shows on the label the exact percentage of naturalness of its formula; the exact percentages of biodegradability are also listed in each individual product sheet.

The value of the RENAISSANCE family has been enhanced by the CERTIFICATIONS listed:

BEAUTY

The efficacy and effects of the RENAISSANCE family on scalp purification, stimulation of hair bulbs for healthy and vigorous hair growth, and anti-aging protection and regeneration of scalp and skin, make it uniquely suited to offer extraordinary natural treatments to suit every salon client's needs.

CARE INSTRUCTIONS:

Apply to damp or dry scalp, hair and skin.

No rinse. Use in synergy with technical or care products.

Suitable for daily use. For professional use and salon retail only.

RECOMMENDED TREATMENT FREQUENCY:

Can be used daily or as needed.

SPECIAL NATURAL INGREDIENTS:

ALOE

Acts thanks to the high concentration of low and high molecular weight polysaccharides, simple sugars, amino acids, vitamins A, C, E and plant steroids and minerals, giving us its soothing, healing, moisturizing and nourishing properties. It regenerates the natural well-being of scalp and skin, while also stimulating elastin and collagen.

RECYCLED PUMPKIN SEEDS

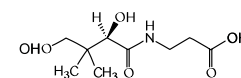

The production of pumpkin seed oil in Europe is carried out through cold pressing. The residue of this process is called “expeller” and is a by-product with very high protein content. Pumpkin proteins from upcycling have been enzymatically hydrolyzed thus obtaining Pumpcoll, which promotes hydration, elasticity, skin tone, and plumps the skin with better results than animal collagen.

CHAMOMILE OIL

Contains flavonoid antioxidants, quercetin and patulein, whose properties act as antibacterial, antimicrobial and anti-inflammatory principles. Useful for treating acne or eczema and excellent anti-age with soothing properties.

PANTHENOL

It is a derivative of vitamin B, derived from the word “pantohen” which means “everywhere” because it is suitable for all scalp and skin types. It penetrates well into the skin and increases the proliferation of fibroblasts that speed wound healing. It acts as a moisturizing and anti-inflammatory topical protectant.
